

IDEATION PHASE BRAINSTORM & IDEA PRIORITIZATION

Date	28 OCTOBER 2023
Team ID	NM2023TMID11339
Project Name	ELECTRONIC VOTING SYSTEM
Maximum Marks	4 Marks

BRAINSTORM & IDEA PRIORITIZATION:

Electronic voting (also known as e-voting) is voting that uses electronic means to either aid or take care of casting and counting ballots. Depending on the particular implementation, e-voting may use standalone electronic voting machines (also called EVM) or computers connected to the Internet (online voting). It may encompass a range of Internet services, from basic transmission of tabulated results to full-function online voting through common connectable household devices. The degree of automation maybe limited to marking a paper ballot, or may be a comprehensive system of vote input, vote recording, data encryption and transmission to servers, and consolidation and tabulation of election results.

IDEA PRIORITIZATION:
